manufacturer

**Institutional
Signage Catalog**

“ December 10, 2009

Dear Potential Sign Purchaser,
My dad started Akers Signs in 1972 and I was a kid who played in a crib in my parent's sign shop. This business is in my blood, perhaps literally, from all the lead based paints used at the time. I also grew up in the church and worked as an on-staff Youth Minister for 6 years in my early 20's so I understand the needs of churches. I believe in signage as a wise stewardship choice to reach out to the local community and inform and educate them on what lies within the doors.

Whether you are making a signage purchase for a church, school, funeral home or any other business or institution, you can rest assured your business is important to us and your sign will be the best sign possible within the budget you have to work with.

- We recognize a satisfied customer is the greatest sales person we can have.
 - We design with the customers budget and objectives in mind.
- We clarify all the details before manufacturing to be certain of all that is required to satisfy the customer.
 - We recognize that everyone in our company has a contribution to make.
- Our team practices collective creativity and we are constantly improving at what we do collectively and individually.
 - We develop new and innovative products and methods that meet our customers needs and exceed their expectations.
 - We install with the requirements of safety and stability.

Signs quality features

Akers has perfected the blend of **design, materials, manufacturing processes**, and **quality control** with dedicated **craftsmanship** to produce a product of exceptional quality and value. We stand behind this product with an unmatched satisfaction guarantee. We maintain one of the highest production and delivery standards in our market.

Good design is a prerequisite to quality fabrication. Akers product designs are a unique marriage of function, structural Integrity, marketability and value. At Akers we have the experience to Incorporate market demands and manufacturing efficiencies into an effective sign design to offer the **most durable Institutional signs available**.

THE BEST MATERIALS

Years of experience have resulted in selecting only the best specialized materials. Even an exceptional design is limited in performance without equally proven raw materials. As applicable, Akers incorporates premium materials and brand name components into the sign design.

DEDICATED CRAFTSMANSHIP

Design and materials are only as good as the people behind them. Akers provides an unparalleled depth of knowledge, experience, dedication and craftsmanship.

We work closely with our suppliers for specialized staff training. From painting to testing to crating, we've gone the "extra mile" to work with our vendors to ensure the best performance from their products and services.

Certified staff painters paint according to procedures and recommended techniques of our paint supplier.

Our **certified welders** are experts at their trade to ensure product stability without sacrificing visual appeal.

PROVEN MANUFACTURING PROCESSES

We understand that performance is in the preparation. Akers has developed effective manufacturing processes that ensure the best performance in the field before our signs are painted and assembled.

QUALITY CONTROL

Akers has incorporated quality control practices over the years to ensure the consistency of our high quality standards to meet market expectations.

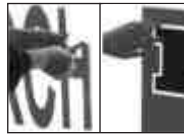

Signs

sign features

Unbreakable Sign Face

Faces are formed from solar grade co-extruded polycarbonate to resist damage from impact and yellowing due to sunlight.

Second Surface Decoration

3M high performance vinyl is applied second surface (inside the face) protected both from vandals and the elements.

Fiberglass Decorative Trim

Gives a smooth, three-dimensional finished look.

Not available in all sizes.

Graffiti-Resistant Paint

Paint is baked on at 180°; graffiti can easily be wiped away.

Locking Vandal Cover

A keyed locking vandal cover system keeps vandals from getting access to the message.

Easy Copy Changes

Self-supporting mechanical props, support the vandal cover opening to 90° for ease of message changes.

Planked Face

Planking in the face adds rigidity to keep the face from sagging and allows air, water and debris to flow through.

Riveted Copy Track

Rivets hold stronger than glue and in combination with the planking allow for easy cleaning.

Strong Structure

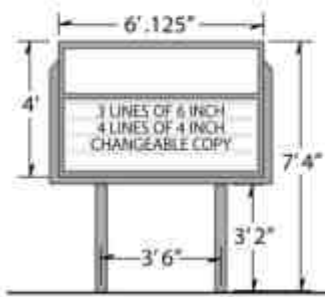

Engineered for strong wind loads to accommodate zoning regulations.

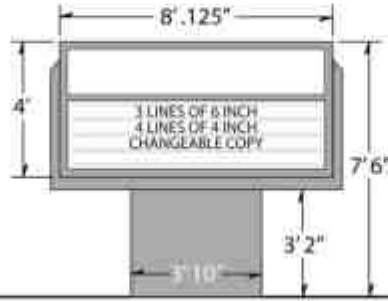

Signs **ECONO** series

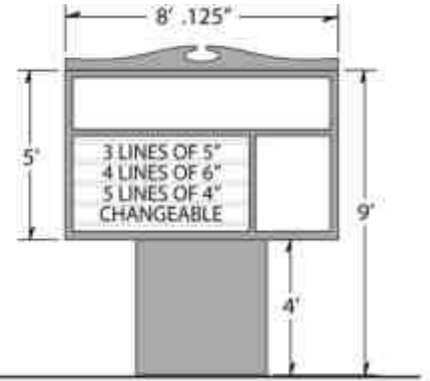

The most popular series for size and value.
